

BZZP

Game Manual

System Requirements

- ✓ Windows XP or later
- ✓ 512 MB of RAM
- ✓ 64 MB of free Hard Drive space
- ✓ Windows compatible audio and graphics cards
- ✓ Mouse or track pad (mouse recommended)

Installation

- ✓ Download and unzip the *installer* file
- ✓ Double-click the *setup.exe* file
- ✓ Follow the onscreen instructions
- ✓ Now you can play!

Story

A meteor carrying the mysterious

Substance X  has crashed on Earth.

All of the animals have been poisoned and are now mutants. It's your job to lead

B33P  through the dangerous lands

and clean up the scattered remains  of the meteor. Clean up enough, and you will

be able to save the animals  from

the deadly Substance X!

Program B33P to victory!

Controls

Use your mouse to click and drag on the board tiles. Release your mouse after a swipe of 3 valid tiles or more and B33P will do the actions in sequence.

If you release your mouse outside of the board, the swipe will be cancelled.

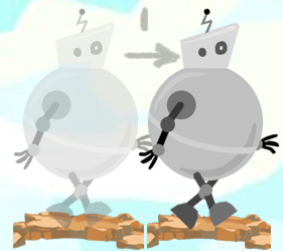

After B33P does all the actions in a swipe, the tiles you used will disappear and new tiles will fall in their place.

Board Tiles

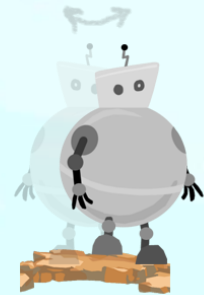

There are eight different types of tiles on the board. Each tile represents a different action. String together a sequence of tiles and B33P will perform the corresponding actions.

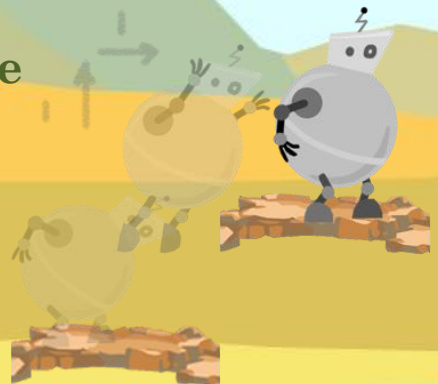

B33P walks forward one space.

B33P turns and faces the other way

B33P jumps one space up and one space forward.

B33P puts on a costumes that lasts for five turns. While disguised, B33P can collide with any matching enemies without being hurt.

B33P repeats his previous action.

B33P stays in place for one turn. This tile is great for timing escapes and avoiding obstacles.

Mutants

The world is a dangerous place, full of radioactive animals that need to be avoided at all cost. If B33P collides with an enemy, he'll die unless he's wearing the right disguise!

Elephant

Elephants walk horizontally on solid surfaces, taking one turn to switch directions.

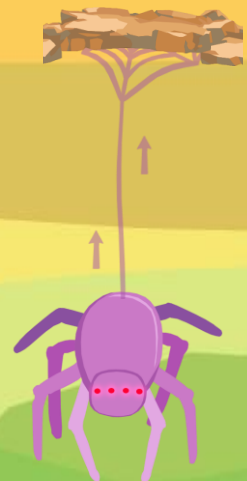

Bird

Birds fly horizontally in the air, taking one turn to switch directions.

Spider

Spiders dangle vertically from their webs and do not take a turn to switch directions.

Platforms

Normal:

B33P can walk on and jump through these platforms.

Tall:

B33P can't jump or walk through these platforms. However, he can walk on top of them.

Hot:

If B33P stays on one of these platforms for longer than a turn, he will die!

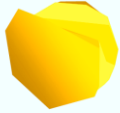

Crumbling:

These platforms will crumble away after B33P steps on them once.

Substance X

Golden (required):

These pieces are especially poisonous. You must collect these to unlock the door leading to the next level.

Green (bonus):

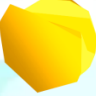

These pieces are not as dangerous. However, the more you collect, the higher your score.

Scoring System

Each green bonus piece B33P collects will increase your score. Using a total of under ten swipes to get through one level will give you bonus points at the end. You will earn one, two or three stars for each level depending on your score.

Objectives

Collect  in each level and then safely get to the exit

Collect as many  as you can to get a high score

Use as few swipes as possible to get bonus points
