

BLACK FRIDAY

a Shopper's Guide

System Requirements

Windows XP/7/8/8.1
Keyboard
Graphics Card with DirectX Support

Installation

1. Double Click Setup.exe
2. Follow the steps given by the Installation Wizard.
3. Double Click the BlackFriday.exe Application
4. Enjoy!

Basic Objectives

Thanksgiving has come and gone and the biggest shopping day of the year is upon us! You are a determined parent who must  sprint and shove through the frantic crowd to retrieve every item on your shopping list and escape the mall before stock runs out.

While competing to snag gifts for loved ones, dodge thieves who could steal your precious gifts. Strategize the optimal path through the labyrinthine mall. On this high holy day of consumer culture, you must fight for your family's materialistic wants and needs.

- + NAVIGATE THE MALL
- + COLLECT ITEMS
- + AVOID THIEVES
- + ESCAPE!

Controls

Basic Movement (Arrows) - Use these keys to move your character around the mall.

Activate Coffee (Space) - If you have coffee, hold down this key to get a boost in movement when you need to escape a tight space. But don't hold it down too long or you'll run out of coffee.

Shove (X) - Press this to give a person who's in your way a little push to move them. But be careful, shove too many people too often when a cop is near and the cop will come for you!

View List (Z) - Hold this key down to view your list of items to obtain in the bottom left corner of your screen.

Stores/Obstacles/Map

You will need to collect various items at the mall. Walk in and out of a store to collect that store's item.

Make sure you walk around items. If you get lost, make sure to visit the map.

Characters

Alan / Annie - A friendly personality, loving husband / wife, and outstanding father / mother, our main character wants nothing more than to please his or her family by getting them the hottest products for Christmas.

Civilian - Don't really know what they want. Sometimes these lovable characters just meander about, getting in the way of any potentially serious shoppers.

Murty - Ex-Blackwater, Ex-Green Beret, Ex-Special Forces, Ex-Navy Seal, Murty's experience gives him the upper hand in mall security. Murty will catch any thieves currently pursuing the player, and escort them out of the mall.

Thief - Had a bad Black Friday once as a child and only wants to ruin it for everybody else by stealing their hard-won gifts. If the player has an item, thieves will pursue the player to try and steal the item and run away.
